JEEVASURENDAR MUTHUKRISHNAN

SENIOR BACKEND / FULL STACK ENGINEER

Node.js | AWS | React.js | Microservices | REST APIs | Socket Mechanism | SQL DB | Redis | Docker | AI/LLM

Bangalore, Karnataka, India | +91 9865790261 | jeevasurendar02@gmail.com | **Immediate Joiner**

PROFESSIONAL SUMMARY

Senior Backend / Full Stack Engineer with **5+ years of experience** designing, developing, and supporting production-grade applications using **Node.js, Express.js, JavaScript, React.js, REST APIs, GraphQL, WebSockets, Microservices, AWS, PostgreSQL, Redis, Docker, Linux, and Nginx**. Experienced in building scalable backend services, full-stack applications, real-time systems, third-party integrations, cloud deployments, production troubleshooting, and performance optimization. Strong domain experience across **IPTV, OTT, Hospitality Infotainment, ISP, DRM, CDN, streaming, and AI-enabled platforms**. Hands-on experience integrating **OpenAI and Anthropic Claude**, LLM-powered workflows, and AI-agent capabilities into production applications.

TECHNICAL SKILLS

Backend: Node.js, Express.js, JavaScript, REST APIs, GraphQL, WebSockets, Microservices, JWT, API Integration
Frontend: React.js, Vue.js, Angular.js, HTML5, CSS3, Responsive Web Development
AWS: EC2, S3, CloudFront, RDS, CloudWatch, IAM, ELB/ALB, Route 53, Lambda, ECR, ECS
Databases: PostgreSQL, MySQL, SQLite, Redis, Sequelize ORM, SQL, Caching
DevOps & Infrastructure: Docker, Linux, Nginx, Shell Scripting, CI/CD, Cloud Deployment, Production Deployment
AI / LLM: OpenAI API, Anthropic Claude API, LLM Integration, AI Agents, Prompt Engineering, AI-assisted Development
Streaming & Media: IPTV, OTT, DRM, HLS, FFmpeg, Video Transcoding, CDN, Live Streaming
Platforms & Integration: Android TV, AOSP, Samsung TEP, LG webOS, Samsung Tizen, Android Bridge, Kotlin

---

PROFESSIONAL EXPERIENCE

Associate Principal Engineer
Infynect Labs Private Limited | Sep 2025 – 2026

- Architected and developed production-grade **Node.js backend and full-stack applications** across IPTV, OTT, Hospitality and AI-enabled products.
- Designed and enhanced **REST API, GraphQL and WebSocket-based services** for production environments.
- Developed React.js application components and integrated them with Node.js backend services.
- Designed modular and service-oriented backend workflows supporting independent development and maintenance.
- Worked with **AWS EC2, S3, CloudFront, RDS, CloudWatch, IAM, ELB/ALB, Route 53, Lambda, ECR and ECS** for application hosting, storage, CDN, database management, monitoring, access control and container deployment.
- Led technical architecture, feature design, backend implementation, integrations and production delivery.
- Introduced **LLM-powered capabilities using OpenAI and Anthropic Claude** across DRM, SMS, Transcoder and HEPI TV workflows.
- Developed **AI-agent capabilities** within HEPI TV applications and backend services.
- Designed AI-driven backend workflows for intelligent application interactions and automated service operations.
- Supported Linux production environments, deployments, troubleshooting, performance optimization and system reliability.

Full Stack Engineer
Infynect Labs Private Limited | May 2024 – Sep 2025

- Built the **Teraband ISP Management Portal** using Node.js, JavaScript, React.js/Vue.js, PostgreSQL, MySQL and REST APIs.
- Developed backend APIs and service workflows supporting **ISP, IPTV, OTT and customer-management operations**.
- Integrated Internet Service Providers, IPTV providers and OTT providers into unified platform workflows.
- Developed full-stack features and integrated frontend applications with Node.js backend services.
- Designed service-oriented workflows for ISP and IPTV platform operations.
- Worked with **AWS CloudFront, S3 and CDN infrastructure** for content and application delivery.
- Developed cross-platform IPTV web applications for **LG webOS, Samsung Tizen and Android TV**.
- Worked with WebOS APIs, Tizen APIs, Android Bridge/Kotlin and device-level integrations.
- Worked with **DRM, HLS, FFmpeg, video transcoding, CDN and streaming workflows**.
- Supported production deployment, troubleshooting, performance optimization and customer delivery.
- Used Claude Code and Claude Cowork for AI-assisted implementation, debugging and code analysis.

Software Engineer II

Infynect Labs Private Limited | May 2023 – May 2024

- Designed and developed the centralized **HEPI TV Hospitality Infotainment Management Portal**.
- Built the complete **HEPI TV Web Application Launcher** for Android TV and AOSP-based STB platforms.
- Developed customized and dynamic SDK reflection capabilities for HEPI TV applications.
- Integrated HEPI TV with **Samsung TEP Hospitality Mode launchers**.
- Developed backend services and integrations supporting IPTV, hospitality, content and service workflows.
- Developed frontend applications and integrated them with backend APIs.
- Worked with Node.js, JavaScript, React.js/Vue.js, REST APIs, Android Bridge, Kotlin, HTML/CSS and Samsung platform technologies.
- Supported production integration, debugging, deployment and platform-specific troubleshooting.

Software Engineer I

Infynect Labs Private Limited | Nov 2021 – May 2023

- Designed and developed the **SMS platform** within the IPTV ecosystem.
- Built and exposed **ISP Management REST APIs** for the IPTV platform.
- Developed and maintained production SMS APIs supporting service operations and customer workflows.
- Built ISP reporting modules based on business and operational requirements.
- Developed backend services using **Node.js and Express.js** with REST and GraphQL APIs.
- Implemented authentication, database workflows, third-party integrations and service-level business logic.
- Developed real-time backend capabilities using **WebSockets**.
- Supported production troubleshooting, API enhancements, CPU Limitation, performance optimization and service reliability.

Frontend Developer Intern

Infynect Labs Private Limited | Sep 2021 – Nov 2021

- Developed frontend applications using JavaScript, Vue.js and Angular.js.
- Migrated an existing Angular application to **Vue.js**.
- Built reusable UI components using Vuestic Admin, Vuestic Dev and Vuetify.
- Integrated frontend applications with REST APIs.
- Worked with component-based architecture, debugging and application development.

KEY PROJECTS

HEPI TV — AI-Powered Hospitality Infotainment Platform

Node.js | React.js | REST APIs | GraphQL | WebSockets | AWS | PostgreSQL | Redis | OpenAI | Anthropic Claude | AI Agents | Android TV | AOSP | Samsung TEP

- Production hospitality infotainment platform supporting **Web, Android TV, AOSP STB and Samsung TEP** environments.
- Developed backend and full-stack services for content, subscriber, service and platform workflows.
- Built Node.js APIs and real-time communication using WebSockets.
- Integrated React.js applications with Node.js backend services.
- Used AWS infrastructure for application hosting, storage, content delivery and monitoring.
- Integrated **OpenAI and Anthropic Claude** for LLM-powered product capabilities.
- Developed AI-agent capabilities across HEPI TV application and backend services.
- Developed device and platform integrations using Android Bridge/Kotlin and Samsung technologies.
- Supported production architecture, deployment, troubleshooting and performance optimization.

IPTV Service Platform — Service-Based Architecture

Node.js | Express.js | Microservices | REST APIs | GraphQL | PostgreSQL | Redis | Docker | AWS | Linux | Nginx | DRM | HLS | FFmpeg | CDN

- Developed a service-based IPTV platform supporting **SMS, ISP Management, Subscriber Management, DRM, Transcoding, CDN and Content Delivery**.
- Built REST and GraphQL APIs for internal services and third-party integrations.
- Implemented database, caching, authentication, reporting and service-management workflows.
- Worked with HLS, FFmpeg, NVIDIA GPU-enabled media processing, live streaming and CDN infrastructure.
- Used Docker and Linux-based environments for deployment and service management.
- Supported production troubleshooting, performance optimization and service reliability.

Teraband ISP Management Portal

Node.js | React.js | JavaScript | PostgreSQL | MySQL | REST APIs | AWS | AI

- Built an ISP management platform integrating **Internet, IPTV and OTT providers**.
- Developed backend APIs and frontend functionality for ISP operations and platform management.
- Implemented provider integrations and production-ready business workflows.
- Used Claude Code and Claude Cowork for AI-assisted development.

CRM Platform

Node.js | Express.js | React.js | PostgreSQL | MySQL | REST APIs | JWT

- Developed full-stack CRM applications with secure REST APIs, JWT authentication and database integration.
- Implemented frontend/backend integration and database-driven customer-management workflows.

PROFESSIONAL STRENGTHS

- Backend Architecture
- Microservices

- API Design
- Full-Stack Development
- Cloud Integration
- Production Troubleshooting
- Performance Optimization
- System Integration
- Technical Leadership
- End-to-End Feature Ownership

DOMAIN EXPERTISE

- **IPTV & OTT:** Subscriber Management, DRM, Content Delivery, CDN, HLS, Transcoding, Streaming
- **Hospitality:** HEPI TV, Hospitality TV, Android TV, AOSP STB, Samsung TEP
- **ISP:** ISP Management, ISP Reporting, Provider Integrations
- **AI:** OpenAI, Anthropic Claude, LLM Integration, AI Agents
- **Cross-Platform TV:** LG webOS, Samsung Tizen, Android TV

EDUCATION

Bachelor of Science in Computer Science

K.S. Rangasamy College of Arts & Science – Periyar University

Tiruchengode, Namakkal | 2018 – 2021
